

Senior IT Project Manager – Security (18015)

Our client has an immediate contract need for a Senior IT Project Manager. To perform this job successfully, we need an experienced project manager to help ensuring that network traffic between on-premises devices and the cloud provider complies with the organization's security policies.

Responsibilities:

- Coordinate across teams to identify their requirements.
- Determine project governance and decision-making structure.
- Work to build consensus with stakeholders.
- Establish project roles and responsibilities and provide team members with clear direction, including identification and management of issues and risks, and tracking of execution against tasks.
- Monitor, evaluate and report on Project status inclusive of scope, schedule, decision tracking, budget and alignment to RFI/RFP and strategic goals.
- Create comprehensive project plans; detailing project schedule, resource estimates, quality requirements and metrics, and cultural change management activities.
- Define and document project work breakdowns, monitor task status, update work estimates and incorporate new tasks into plan as needed.
- Produce meeting notes & action items for team meetings.

Requirements:

- Experience leading large projects that span multiple organizations and disciplines to include cultural change management and process management.
- Effective at driving discussions and gaining commitments during cross team engagements with the ability to quantify and explain value across different levels of stakeholders.
- 7+ years of experience in Information Security project-based roles.
- Understanding of Waterfall and Agile/Scrum project methodologies.
- Excellent verbal and written communication skills.
- Highly organized and detail oriented.
- Possess strong cross team/group/organization collaboration skills; ability to foresee and analyze project risks, develop risk management plan and mitigate subsequent issues.
- High level understanding of data loss prevention and the value it provides across security workflows.
- Bachelor's Degree or equivalent work experience.
- PMP certification is a plus, but not required.

Axelerate offers Equal Employment Opportunity to all applicants regardless of race, religion, color, sex (including pregnancy, gender identity, and sexual orientation), parental status, national origin, age, disability, family medical history or genetic information, political affiliation, military service, or other non-merit based factors. These protections extend to all management practices and decisions, including recruitment and hiring practices, appraisal systems, promotions, and training and career development programs.
