

Senior Project Manager – Telecom (17047)

Business Overview:

Project Manager needed to on-board a new cross-functional tool. The ideal candidate will have strong Program and Project Management skills, be interested in and able to understand business strategy, Finance, Telecom Circuit ordering, Telecom invoices and establishing processes. They must have the ability to focus at a detailed level and have great communications skills.

Responsibilities:

- Work directly with supplier PM.
- Be the liaison between Client's internal teams and tool supplier Development team.
- Develop a detailed project plan to track progress.
- Communicate project status and escalate issues timely.
- Drive development and implementation of new Telecommunication tool.
- Assist with User Acceptance Testing (UAT) processes, including scenario and test case generation, end-user testing logistics, testing execution and business sign-off.

Skills/qualifications:

- Drive a program end to end independently.
- Strong project management skills, good communication and collaboration skills.
- Experience with contractual information gathering, understanding, and disseminating of information to other teams.
- Ability to communicate requirements to and from both business and technical teams.
- Ability to present to stakeholders.
- Work with stakeholders and drive the prioritization of requirements.
- 10+ years Project Management.
- Proficient in MS Office Suite.
- Microsoft 18/6 eligibility.

Nice to have:

- Telephony background – transport order process and Telecom Expense Management.
