

Software Design Engineer (18003)

Our client is looking for an engineer to help run a global service with millions of dollars of revenue flowing daily. Help drive the business and help identify gaps in our systems and make sure that we deliver a great experience for our customers. You will need to identify patterns in our ecosystem and drive system improvements into the core while expanding our ability to detect and fix these problems in real time.

Responsibilities:

- Evaluate the effectiveness and efficacy of existing code solutions and architecture.
- Support Ecommerce Production efforts to automate and drive process improvements with a focus on data quality and automation.
- Collaborate with other team members to deliver quality code.
- Become familiar with differing data source platforms.
- Show measurable progress through continuous delivery.

Qualifications:

- 5+ years demonstrated experience in designing and developing enterprise-level internet scale services/solutions.
- Strong programming skills in C# or Java.
- Experience with PowerShell.
- Solid technical aptitude and problem-solving skills, take initiative, and must be result driven with strong debugging skills.
- Experience with Cloud Platforms like Auto pilot, Windows Azure Platform, Amazon AWS.
- Experience with Big Data/Analytic Systems like Cosmos or Hadoop implementations.
- Experience in Ecommerce and/or Supply Chain.

Please note: we are unable to consider third party candidates for this position.

Axelerate offers Equal Employment Opportunity to all applicants regardless of race, religion, color, sex (including pregnancy, gender identity, and sexual orientation), parental status, national origin, age, disability, family medical history or genetic information, political affiliation, military service, or other non-merit based factors.
